

SHARPE® VALVES

**SERIES CL
CHLORINE BALL VALVES**

SHARPE® HIGH PERFORMANCE CHLORINE BALL VALVES

Sharpe® Series 84/99/50 Ball Valves offer as standard features advantages that other valve manufacturers offer only as costly extras. This is the Sharpe® advantage.

STANDARD FEATURES

Valves meet specifications of Chlorine Institute Pamphlet 6, Piping Systems for Dry Chlorine

Pressure relief hole in side of ball

Relief hole in stem slot

Live load stem packing (Belleville Washers)

Visual position indicator

Special cleaning

Special packing

Available in a variety of material combinations

Series 84/99

Bottom Entry Stem

High Cycle Stem Packing

Fully Encapsulated Body Seals
(Series 84/99)

Integral Mounting Pad

Lockable Handle

Slotted Seat Design

Traceability

ADVANTAGES

Insures proper construction, testing and packaging in appropriate service conditions.

Upstream vent for excessive valve cavity pressure in closed position.

Equals valve cavity pressure and line pressure in open position.

Provides long intervals between stem packing adjustments, decreasing emissions through the packing.

Provides easy identification of valve position

Ready to use in critical applications

Keeps the valve in Factory-new condition until it is to be installed.

Fill most Chlorine Service applications from the inventory at Sharpe® Valves, variety of end connections. (84/99)

In-line serviceable swing-out center section allows easy access to internal valve components without disturbing alignment of pipe. Functions as both valve and union. Prevents accidental removal of stem under pressure.

Self adjusts with pressure and temperature fluctuations. Blow-out proof helps prevent accidents and injuries.

Peek and Nova* thrust bearings and stem seals extend valve cycle life over conventional ball valves and are the best choice for actuation.

Allows valve ends to be welded in line without disassembly, saving costly labor time. Also prevents seal ruptures in high pressure or steam applications.

Ideal for actuation. Centering lip feature assures precise alignment of bracket, stem and coupler. Allows for secondary containment unit to be added when necessary.

All Sharpe® Series CL Valves meet OSHA standards with locking device. Keeps valves from being opened or closed accidentally.

Relief slots help equalize body pressure, reduce torque and assure leak-tight sealing. Seats also provide a wiping action that cleans ball and seats each time valve is cycled.

Heat numbers are provided on all valve bodies and ends. CMTR's (certified mill test reports) are available upon request.

* Carbon and Graphite Filled Teflon®
